

PIVOT ASCENT App Store Submission Guide

Decent Games | iPhone release package | Version 1.0 preparation

This package contains the approved product-page copy, iPhone screenshots, app icon, and a practical upload checklist for PIVOT ASCENT. The game content supports 20 hand-built levels and a daily challenge. Before App Review, replace the marked owner-supplied fields with Decent Games account details and complete the iOS build settings listed below.

Package contents

Item	Location	Ready state
App icon	app_icon_1024.png	1024 by 1024 PNG, opaque; import into Unity iOS App Icons.
iPhone screenshots	screenshots_iphone_6_9/	Four PNGs at 1290 by 2796, no alpha.
Store listing	store_listing/App Store Copy.txt	English metadata ready to paste.
Review notes	review_materials/App Review Notes.txt	Instructions for reviewer and test details.
Privacy policy draft	review_materials/Privacy Policy Draft.txt	Publish at a public HTTPS URL, then insert that URL.
iOS build notes	technical_notes/iOS Build Settings to Apply.txt	Required project changes before archive.

Product page metadata

App Store field	Prepared value
Name	PIVOT ASCENT
Subtitle	Swing. Pivot. Reach the summit.
Promotional text	A precision ascent built around timing, momentum, and one more perfect swing.
Primary category	Games - Puzzle
Secondary category	Games - Casual
Content rights	Does not contain, show, or access third-party content.
Copyright	2026 Decent Games
Version	1.0.0 for release. Raise the build number for each upload.
Support URL	[REPLACE WITH DECENT GAMES SUPPORT PAGE]
Marketing URL	Optional. Use only if a public PIVOT ASCENT page exists.
Privacy policy URL	[REPLACE WITH PUBLIC HTTPS PRIVACY POLICY URL]

Description and keywords

Full description PIVOT ASCENT is a focused physics puzzle about turning momentum into altitude. Tap to swing between glowing anchors, thread through hazards, collect gems, and keep climbing toward the summit.

Master short, satisfying runs across 20 handcrafted levels, then return for a fresh Daily Challenge. Every move is simple. Every ascent demands precision.

- Features
- Tap-to-swing momentum gameplay
 - 20 handcrafted precision climbs
 - Gems to collect on every route
 - A new Daily Challenge each day
 - Clean neon visuals and responsive audio
 - Play at your own pace

Field	Prepared value	Limit
Keywords	pivot, ascent, swing, physics, puzzle, climbing, arcade, momentum, neon, summit	100 characters; commas separate terms.
Subtitle	Swing. Pivot. Reach the summit.	30 characters.
Promotional text	A precision ascent built around timing, momentum, and one more perfect swing.	170 characters.

Screenshots

Upload the four PNGs in the order below to the iPhone 6.9-inch screenshot set. They use Apple’s accepted 1290 by 2796 portrait size. Apple allows 1 to 10 screenshots, PNG or JPEG, and images must not contain alpha transparency.

Order	File	Feature shown
1	01_main_menu.png	Clear game identity, campaign, daily challenge, and leaderboard entry points.
2	02_precision_climb.png	Mid-game precision swing, hazards, gems, and climb HUD.
3	03_grand_ascent.png	Late-game challenge and summit-focused progression.
4	04_daily_challenge.png	Replayable daily summit with time and score.

Mandatory App Store Connect work

Task	Who supplies it	Status
Apple Developer Program membership and App Store Connect access	Account holder	Required before upload.
Unique Bundle ID and SKU	Decent Games	Required. Current Unity identifier is a template value and must not be used.
App record, name, primary language, bundle ID, SKU, user access	App Store Connect admin	Create before build upload.
Version metadata, category, age-rating questionnaire, screenshots	App Store Connect admin	Prepared except age questionnaire selections.
Privacy policy URL and App Privacy answers	Decent Games	Required. Confirm no data collection only if no analytics, ads, or third-party SDK sends data off device.
Signed iOS archive uploaded from Xcode or Transporter	Build owner	Required. Select it on the version page once processed.
Export compliance	Build owner	Answer based on the final binary; common games without custom encryption may qualify for the standard exemption.
App Review contact, notes, and demo account	Decent Games	Contact is required. No demo account is needed if the game remains sign-in-free.

iOS build checklist

- Set the iPhone Bundle Identifier to a Decent Games-owned identifier, for example com.decentgames.pivotascent, after confirming it is available in Apple Developer.
- Set Version to 1.0.0 and iOS Build number to 1. Increment the build number for every upload.
- Replace the Unity template app icon with app_icon_1024.png in Player Settings for iOS. Confirm it is opaque and has no rounded-corner mask baked in.
- Build the iOS Xcode project, archive it in Xcode, validate, and upload. Test the exact archive on a physical iPhone through TestFlight before submission.
- Check every UI screen on a current iPhone: first launch, all 20 levels, daily challenge, sound controls, background and foreground recovery, and no-network behavior.
- Inspect the final archive for third-party SDKs. If any are added, include their current privacy manifests and update the App Privacy response to include their collection practices.
- Do not enable tracking permission unless the released build tracks users across apps or websites. If ads or analytics are added later, reassess ATT and privacy disclosures.

Recommended App Review answers for this build

These are recommendations based on the current project only. Confirm them against the final binary before submitting.

Question	Recommended response
Sign-in required?	No.
In-app purchases or subscriptions?	No evidence in the current project. Select No unless monetization is added.
Advertising?	No evidence in the current project. Select No unless an ad SDK is added.
Data collection?	No, only if the final app and all embedded SDKs do not transmit data off-device beyond real-time servicing. Otherwise disclose every collected type and purpose.
Age rating	Complete Apple's questionnaire. Based on the current nonviolent abstract puzzle gameplay, select no content descriptors that are not present; Apple calculates the rating.
App Review demo account?	Not required because the game is playable without an account.

Final release sequence

- Create the bundle ID and App Store Connect record with the final name and SKU.
- Apply the iOS build settings and app icon, then produce an Xcode archive.
- Upload to TestFlight, test the exact build, and correct any crash or layout issue.
- Paste the prepared metadata, upload the screenshots, complete age rating, privacy, export compliance, and App Review contact information.
- Choose the processed build, add it for review, verify every required field is complete, then submit for review.
